Isolation Workflow: Isolation is the procedure that must be followed for all Covid+ individuals, with or without symptoms. It can begin with either COVID symptoms, or a COVID + test (as described in the workflow)
Quarantine Workflow: Quarantine is required for those with known exposure to COVID-19, but who remain asymptomatic. The quarantine workflow begins with a known exposure to COVID-19, but the absence of COVID-19 symptoms.

A mandatory Quarantine Order and Quarantine Guidelines are sent to the individual by MCDPH.

If the individual is deemed essential and critical for the operation and safety of the workplace:

- Call the Monroe County COVID Hotline: 1 (585) 733-5555
- Ask to speak to a Public Health Supervisor regarding a quarantine exemption for an essential worker.

Asymptomatic employees may return to work, so long as the individual adheres to the following practices, which must be monitored and documented by the employer:

- **Regular Monitoring:** Self monitor temperature ≥ 100 degrees every 12 hours
- **Wear a Mask:** Wear a mask in the work place at all times for 14 days
- **Social Distance:** Maintain at least 6 feet of distance from others at all times
- **Clean and Disinfect Workspaces:** The employer must regularly clean and disinfect all areas
- **Maintain Quarantine:** The individual must self-quarantine when not in the workplace.

End quarantine
